

life in Green™

Grow Responsibly & Evolve Eco-consciously, Now.

PRODUCT CATALOGUE

Founded in 2009 and based in Montreal, Canada, Life in Green is your **One-Stop Shop** for all your **compostable** and **eco-friendly disposable product** needs. From coffee cups and lids, to cold cups, plates, bowls, takeout containers and cutlery, we offer the right environmentally friendly solution every time.

Our mission is to offer innovative products and solutions that have a positive impact on our customers and their environment.

Grow Responsibly & Evolve Eco-consciously, Now.

Driven by excellence, we believe in building long-term relationships with all our customers. As an industry leader with tremendous experience and expertise in global sourcing, we offer many advantages such as:

- **Quick Product Availability**
- **High Adaptability**
- **World-Class Products**
- **Smart Product Construction**
- **Operational Efficiency**

Compostable Sugarcane Plates & Bowls

Product Details

- Great alternative to traditional paper, plastic & Styrofoam dinnerware.
- Plates are available in 3 formats : 6", 9" & 10.25".
- Bowls are available in 12oz format.
- Durable, grease-resistant & microwave safe up to 300°F.

Materials

- Made from renewable resources.
- Sugarcane fiber.
- Also known as bagasse, this material is a reclaimed resource and a substitute for tree fiber.
(refer to p.20 for more details)
- Compostable & biodegradable.

Kraft Takeout Boxes

Product Details

- A cost effective, ideal alternative to traditional plastic or foam containers.
- Maximum grease & moisture barrier for both hot & cold items.
- Leak & cut resistant.
- Close flap to keep food hot and fresh.
- Available in several sizes to work with a wide range of food.
- Freezer safe.

Materials

- Made from renewable resources.
- Made from 100% recycled paper.
- Kraft material with PE coating.
- Chlorine free.

PSM Cutlery

Product Details

- Most cost-effective alternative to conventional disposable plastic knives, forks and spoons.
- Durable & grease resistant.
- Reinforced handles provide extra strength & stability.
- Resistant to high temperatures, up to 200°F.
- Safe for food contact.

Materials

- Plant starch material is made with a blend of renewable resources and traditional plastic.
- A bio-based thermoplastic resin composed of starch powder and mixed with polypropylene material.
- A more sustainable choice than traditional cutlery made of 100% virgin plastic.

Clear Plastic PET Cold Cups

Product Details

- Ideal for cold beverage applications.
- Clear plastic cups provide excellent clarity and enticing view of the cup's contents.
- High-quality durable & crack-resistant plastic material.
- Rolled rim for a comfortable drink experience & secure lid fit.
- Available in clear & private print.
- Available matching dome & flat lids with one lid fits all formats from 12 to 24 oz.

Materials

- Ultra-clear virgin plastic
- BPA Free
- Recyclable #1

Build your brand with a customizable cup or sleeve!

Life in Green can help you deliver a branded experience to your customers & employees. We typically start by brainstorming ideas with our clients, so we can understand the type of design and messaging you want to convey with the cups. Our cups & sleeves are fully customizable so we can tailor them specifically to reflect your brand, logo, colors and message. In short, our marketing creative team will work with you to develop the perfect cup concept for your company.

Private Print Cups

- Available in single wall, double wall, ripple & vending cup types.
- Available in 4 to 24oz formats.
- Available in compostable cup option lined with a plant-based PLA material (**BPI certified**) or lined with PE material.

New! Private Print Cold Cups

- Available in 12 to 24oz formats.

Private Print Sleeves

- Available in small, medium & large formats.
- Fitting single wall 8 to 24oz cups.
- Made with kraft material, our sleeves are recyclable, compostable & biodegradable (**BPI certified**).

WHY LIFE IN GREEN?

Agile Business Approach

Quality Products

Quick Product Availability

- National Coverage
- 3 Distribution Centers (Atlanta, Montreal & Vancouver)
- Global Sourcing
- Logistic Expertise

High Adaptability

- Market Knowledge
- Service Oriented
- Scalable Business Model
- Competitive & Customized Pricing
- Flexible MOQ

One-Stop Shop

- Compostable, recyclable & eco-friendly products
- Coffee cups & lids selection
- Private label services (cups & sleeves)
- Food service products (plates, bowls, takeout containers & cutlery)

High Quality Raw Material

- Heavy paperboard
- Compostable Options
- Recyclable Options
- Made from renewable sources

Smart Product Construction

- High quality paper
- Vibrant color printing
- Above industry standard lining
- Optimal leak resistance
- Tight rim roll for optimal rigidity

Operational Efficiency in Mind

- 1000 count per case
- One Lid Fits All (10-24oz)
- Compatible Lid & Cup Fit
- Optimal for hot & cold beverages

ALTERNATIVE MATERIALS

We understand the connection between the health of the planet and the impact of disposable packaging. Every day we work to advance Zero Waste systems and help our customers transition into environmentally preferable packaging. As an industry leader, we're passionate about scaling waste diversion practices by offering a broad assortment of compostable, biodegradable, and recyclable disposable packaging solutions, using renewable resources and post-consumer recycled content.

Polylactic Acid Liner (PLA)

Also known as "corn plastic", this is a biopolymer made from polylactic acid (PLA), derived from starchy plants such as corn, potatoes, tapioca, sugarcane, and soy protein. The plant is milled and processed to extract the starch, which is then converted into plastic. The plant-based liner is used for **compostable cups**. It is also the material used to make our **compostable lids**.

Kraft Material

The kraft material used for our sleeves and take-out containers is made using only **post-consumer recycled fibers** produced through a self-sustaining process during which chemicals are either recovered or reused in kraft paper production. The un-coated kraft material is used for **compostable sleeves** & the 100% recycled paper is used for our **kraft takeout containers**.

Sugarcane Fiber

The sugarcane material is also known as "bagasse". It is the dry, pulpy, fibrous material that remains after crushing the sugarcane. Typically, once the cane juice is extracted, the sugarcane stalk "bagasse" would be discarded. Thanks to a new technological process, these crushed stalks are instead being saved and broken down into a pulp as a substitute for tree fiber. This process makes it a **reclaimed resource** that we use to create **compostable** products such as **plates, bowls, and takeout containers**.

CERTIFICATIONS

Compostable & Biodegradable Products

All our compostable cups, lids, sleeves, plates, bowls and take-out containers are **BPI certified**.

The **BPI's certification** guarantees that these products are **compostable & biodegradable** in an industrial composting plant. This applies to all materials used in the manufacturing process, such as inks and additives.

The **Biodegradable Products Institute (BPI)** is North America's leading certifier of compostable products and packaging. They promote best practices for the diversion and recovery of compostable materials through municipal and commercial composting.

The certification program ensures that products and packaging displaying the BPI logo meet the requirements in **ASTM D6400** (covers, plastics and products made from plastics that are designed to be composted in municipal and industrial aerobic composting facilities) or **ASTM D6868** (biodegradable plastics and products including packaging, where plastic film or sheet is attached to substrates and the entire product or package is designed to be composted in municipal and industrial aerobic composting facilities).

OUR OPERATIONS

For more than a decade, we've used our deep knowledge of the coffee industry and agile approach to develop and deliver innovative world-class products. With manufacturing facilities around the world, three distribution centers in North America and one soon to open in Europe, we're giving sustainability a truly global platform.

A LOOK AT YEARLY CUPS VOLUME & MANUFACTURING FACILITIES

We believe in building **long term partnerships** with all our customers through our **customer centric** approach. We take great pride in the **premium quality** of our products and aim to have a positive impact on the environment by making **sustainability** accessible. Our best practices, product development and material sourcing each reflect our commitment to **innovate** and provide full-circle supply solutions that nature would approve.
