## Sleeves & Stirrers

### SLEEVES

#### Product Details

- Provides an extra layer of insulating comfort.
- Available in 3 sizes to fit 8 to 24 oz single wall cups.
- Private print available in Kraft & White colors.

#### Materials

- Made from renewable resources.
- Made from 100% recycled paper.
- Compostable, biodegradable & recyclable.
- Natural kraft sleeves are uncoated & unbleached.

### STIRRERS

#### Product Details

- Eco-Friendly wood stirrers.
- Soft, durable, compostable, and it does not change the taste of the food.
- Designed to mix any beverage.
- Available in 5.5" and 7" formats.

#### Materials

- 100% white birch wood.
- Made from a renewable resource.
- Wooden stirrers are a more sustainable alternative to plastic stirrers.
- Biodegradable.

# Private Print

*Did you know  
you can brand  
your own  
cups?*

Life in Green can help you deliver a **branded experience** to your customers & employees. Our cups & sleeves are **fully customizable** to reflect your brand, logo, colors, and brand message. Our marketing team will work with you to develop the perfect cup concept for your company. All our cup types are fully customizable in our TruEco, PLA and PE options:

- Single Wall
- Double Wall
- Ripple Wall
- Vending
- Sleeves
- PET Cups

# Why <sup>life in</sup> Green?

## Quick Product Availability

- International Coverage
- 3 Distribution Centers in North America
- Global Sourcing
- Logistic Expertise

## High Adaptability

- Deep Market Knowledge
- Service Oriented
- Competitive & Customized Pricing
- Flexible MOQ

## One-Stop Shop

- Compostable, recyclable & eco-friendly products
- Private label services (cups & sleeves)
- Food service products (plates, bowls, takeout containers & cutlery)

## High Quality Raw Material

- Heavy paperboard
- Compostable Options
- Recyclable Options
- Made from renewable sources

## Smart Product Construction

- High quality paper
- Vibrant color printing
- Above industry standard lining
- Optimal leak resistance
- Tight rim roll for optimal rigidity

## Operational Efficiency

- 1000 count per case
- One Lid Fits All (10-24oz)
- Compatible Lid & Cup Fit
- Optimal for hot & cold beverages

# We use alternative MATERIALS

## TruEco Paperboard (Aquabased lining)

It features a double aquabased coating with a new manufacturing process. TruEco is the most sustainable option when it comes to paper cups. 100% Home-Compostable, Recyclable and Plastic-Free.

## Polylactic Acid Liner (PLA)

Also known as "corn starch", this is a biopolymer made from polylactic acid (PLA), derived from starchy plants such as corn, potatoes, etc. The plant-based liner is used for compostable cups.

## Kraft Paperboard

This material used for our sleeves is made using only post-consumer recycled fibers produced through a self-sustaining process during which chemicals are either recovered or reused in kraft paper production.

## Sugarcane Fiber

Also known as "bagasse", it is the dry, fibrous material that remains after crushing sugarcane. Once the cane juice is extracted, the remaining stalks are saved and broken down into a pulp which is used as a substitute for tree fiber.
